

## Light on Luxury

Designed by Ecodesign and constructed by Senator Pools, this spectacular swimming pool features a unique, in-built lounge area which spans one side of the pool for immersive relaxation. Adrian Swain, Director of Ecodesign, says "Our design kept to the brief from Merit Homes, which was to integrate pool and landscape to create a truly unique outdoor living environment, to complement the luxury home. The landscapes beautifully reflect the lines of the house, with glossy green foliage providing a solid background to the bold and contemporary colours in the pool." Low voltage LED garden lighting ensures the landscape design and pool are as dramatic by night as by day.
