

LIGHTEN UP!

Zen Tranquillity

Sydney-based landscape design practice Ecodesign brought a true Japanese sense of Zen to the landscapes within the Sekisui House display village located at Kellyville HomeWorld. Says Director Adrian Swain, "The project consists of a village of six homes linked with boardwalk like paths made from bamboo decking."

Spectacular, well-detailed and functional outdoor living environments are a feature of each house, their sense of tranquillity highlighted at night by the careful placement of low voltage LED lighting.
